ITCentrix Announces Delivery of its SAN Value Tool

STILL RIVER, MA - November 1, 1999 - ITCentrix, a leading developer of innovative IT decision support solutions, today announced it has begun sales of the SAN Value Tool 2.0. The software announced is a standalone, Windows-based decision support application designed to help IT and Business Professionals quantify the business value of a SAN infrastructure. The tool, uses the ITCentrix Value Tool to quantify value in three areas, including:

- o Cost Savings;
- o Availability Value;
- o The Value of Faster Application Deployment.

The software includes an easy-to-use front-end interface complete with a number of functions to assist users in applying the Rapid Assessment Methodology of ITCentrix. The software presents an "apples-to-apples" business case for different storage approaches including:

- o Distributed Storage - outside of a data center;
- o Collocated Storage - moved into a data center;
- o Basic SAN - involves rudimentary any-to-any connectivity and I/O;
- o Enhanced SAN - includes more sophisticated volume and file management in addition to other software functions;
- o Future SAN - is a fully enabled SAN offering with dynamic volume management in addition to a global file system.

1661 Worcester Road
Framingham MA
01701
508.620.6336

The software was developed with inputs from Global 2000 and smaller companies and contains comparative industry information to allow customers to predict the benefits based on such factors as workload and complexity of environment. The software, ITCentrix used its database of storage customers that currently contains more than 300 data points on storage management effectiveness within large and medium sized organizations in the U.S. and Europe.

Commenting on the announcement, Dave Vellante, President of ITCentrix, said, "In the last 18 months we have gone from proof-of-concept to a fully operational, revenue-generating business."

software tool. Our customers are pushing us to add new function at a fast pace. We are excited about the prospects of not only enhancing this software but applying the framework to new technology areas."

Version 2.0 of the ITCentrix SAN Value Tool currently is available to assist with infrastructure in Unix and NT environments with future platforms expected in the second half of 2000.

About ITCentrix

ITCentrix is a pre-IPO software and services company founded in 1999 by business and technology experts. The company develops powerful decision support software and complimentary services to help its clients make *rapid*, high quality decisions in their specific business context. ITCentrix has performed numerous assessments in Global 2000 and smaller organizations using its proprietary *Rapid Assessment Methodology* to help companies avoid costs, improve efficiency and accelerate time-to-market.

New World Data Center Conference Offers a No-Nonsense Seminar For IT
Decision Makers to Transform Their Data Centers for Increased e Business
Value

NEEDHAM, Mass., Aug. 25 /PRNewswire/ -- Ziff-Davis announced today
The New World Data Center Conference, an invaluable two-day conference
designed to help IT Professionals increase their companies' business value
by dramatically improving service levels and time-to-market. With the
advent of the Internet and the growth of e-commerce, the role of the data
center has changed from focusing on reducing operational costs to
increasing business value to customers. This critical IT conference will be
held October 4 -- 5, 1999 at the Boston Park Plaza Hotel, in Boston,
Massachusetts.

"The growth of the Internet has put tremendous pressure on businesses
to change -- and quickly," said Kim Myhre, vice president, ZD Studios. "The
Web has become the new playing field on which companies must compete. As a
result, many organizations are now re-focusing their IT structure to create
a 'new world' data center that will support the need of e-commerce.
Traditional data center models must now be transformed into Web-enabled
communications and transaction systems that are focused on interacting with
customers. The New World Data Center Conference is specifically designed to
help IT organizations make this transformation to increase e-business
value."

The New World Data Center, the fifth offering in ZD Studio's New
World Network Conference series, will bring together leading IT experts to
share their insights, and provide education and practical methodologies to
support data center transformation. Attendees to the New World Data Center
Conference will hear first hand how to:

- Harness the power of the Internet
- Create new IT business value
- Reduce time-to-market for revenue-generating applications
- Leverage emerging outsourcing services
- Increase customer satisfaction

Industry experts will also be on hand to share their perspectives on
how integral data centers are to their companies overall success. Keynote
addresses will be presented by:

- Selby Wellman, senior vice president, Cisco Systems, Inc.
- Douglas Mow, vice president of Internet multi-media marketing,
Qwest Communications

Speakers for the New World Data Center Conference include:

- Susan Almeida, co-founder & managing partner, Network Strategy
Partners, LLC
- Jay Bretzman, netfinity strategy & market segment manager, IBM
Corporation
- Paris Burstyn, director, telecommunications industries,
International Data Corporation
- Thomas Flanagan, vice president, The Cordis Group
- David Floyer, founder & vice president/Research, ITcentrix
- Aaron Goldberg, executive vice president, ZD Market Intelligence

-- Gary Habermann, director/technical resources, Widener University
-- David Hill, senior analyst/storage & storage management, Aberdeen Group
-- Brian Jeffery, managing director, International Technology Group
-- Paul Johnston, director/strategic marketing, Cambridge Technology Partners
-- Jeffrey M. Kaplan, director/strategic marketing, International Network Services
-- John McConnell, president, McConnell Associates
-- James Metzler, Ph.D., president, The Metzler Group
-- John Morency, vice president/network business practice, Renaissance Worldwide
-- David Moschella, columnist and senior researcher, Computerworld
-- Art Petrella, network architect, Rosenbluth International
-- David P. Vellante, president, ITcentrix

Cisco Systems, Inc., IBM and Qwest Communications are sponsors of the New World Data Center.

The New World Networks Conference series was developed by ZD Studios and presented in conjunction with, ITcentrix, Interop, Inter@ctive Week and ZD Net. The Series is designed to help end-users, service providers, equipment vendors and content generators manage the challenges and opportunities presented by the transition from traditional voice-driven circuit-switched networks to data intensive packet-switched networks.

For registration or additional information, contact Stacye Montez at 650-578-6831 or stacye_montez@zd.com . For more Conference information visit www.newworldnets.com.
